PROFESSIONAL SUMMARY

Frontend Developer with 5+ years of experience building responsive, high-performance web applications using React.js, Next.js, TypeScript, and modern frontend technologies. Experienced across fintech, e-commerce, AI-driven products, and specialized content platforms, including real-time chat interfaces, marketplace workflows, secure payments, and location-based features. Strong focus on frontend performance, SSR, technical SEO, and scalable UI development, with measurable impact including 40% organic traffic growth and 60%+ improvement in page-load performance.

TECHNICAL SKILLS

Frontend: Next.js, React.js, JavaScript, TypeScript, Redux, jQuery

Styling & UI: TailwindCSS, CSS3, SCSS, Material UI, Ant Design, ShadcnUI

AI Integration: LLM APIs, Streaming Chat UI, AI Workflow Automation

AI Tools: Cursor, Claude Code, Codex

API Integration: REST APIs, Third-Party Services, Webhooks, Analytics integration, WordPress REST API

Tools & Deployment: GitHub, Git CLI, Docker, Vercel, Netlify

PROFESSIONAL EXPERIENCE

Senior Frontend Developer

January 2025 - July 2026

Meyka AI Pvt. Ltd., Remote

- Integrated and optimized an AI chatbot with live streaming of responses, designed the complete chat interface, and ensured smooth performance across sessions, resulting in a 30%+ boost in user engagement.
- Improved SEO by implementing structured data, meta tags, and server-side rendering, achieving a 40% increase in organic traffic and faster indexing on key financial pages.
- Reduced page load times by over 60% through layout optimization, asset compression, controlled third-party scripts, and resolution of layout shift and CLS penalties.

Senior Frontend Developer

January 2024 - December 2024

Swiss Helden GMBH, Remote

- Built Kaufes, a Swiss online marketplace supporting auction-style and buy-it-now listings. Delivered a fast, responsive interface using Next.js, React, TypeScript, and Tailwind CSS that works seamlessly across desktop and mobile.
- Integrated real-time search tools, secure payment flows, listing moderation, geolocation-based shipping, and trust features like verified user badges, collaborating closely with backend, design, and Swiss Post teams.
- Mentored junior developers through regular code reviews, hands-on debugging, and establishing reliable coding patterns that kept the platform stable at scale.

Frontend Developer

May 2023 - December 2023

DynamoLogic Solutions, Remote

- Built a feature-rich Quran reader with complete Arabic script support, multiple font formats, phonetic transliterations, translations, audio recitations, Tajweed playback, and verse bookmarking.
- Developed embeddable dynamic Islamic widgets for external sites covering prayer times, Hijri-Gregorian converters, 99 Names, Kalimas, and Ramadan countdown, all customizable and deployable via copy-paste code.
- Built a Qibla Compass using device magnetometer with calibration logic, a location-aware Prayer Times Scheduler, and a fiqh-based Zakat Calculator.

Frontend Developer

January 2023 - April 2023

Accrual Hub, Rawalpindi

- Led React.js development of a form builder and chat application with a focus on smooth interactions and real-time updates.
- Improved frontend performance and resolved stability issues, resulting in a faster and more reliable user experience.

Frontend Developer

February 2022 - December 2022

Alberuni Technologies, Islamabad

- Built responsive interfaces using React.js, Javascript, and jQuery across multiple projects, ensuring consistent layouts across all screen sizes.
- Handled data binding and dynamic updates using jQuery and AJAX to improve UI interactivity and performance.

Junior Frontend Developer

September 2021 - January 2022

Encyrd Technologies, Islamabad

- Translated Figma designs into pixel-perfect React.js components with visual accuracy across all devices.
- Managed component state and data flow using React Redux to ensure smooth and predictable UI behavior.

Junior Frontend Developer

March 2021 - August 2021

Granjur Technologies, Lahore

- Fixed bugs and integrated APIs in React.js projects to ensure smooth data flow and reliable functionality.
- Designed and updated frontend components to enhance user experience and interface usability.

WordPress Developer

January 2020 - February 2021

Fiesta Digital Solutions, Multan

- Built responsive web pages using HTML, CSS, and Bootstrap with clean layouts across all devices.
- Designed and customized WordPress sites using Elementor, Beaver Builder, and Divi with a focus on UX and design consistency.

SELECTED PROJECTS & ACHIEVEMENTS

Meyka AI – AI-Powered Stock Research Platform: Developed key frontend experiences for an AI-driven financial research platform using React/Next.js, including a real-time streaming chatbot, SEO-focused server-side rendering, structured financial pages, and performance optimization.

Kaufes - Swiss Auction & E-Commerce Marketplace: Developed responsive marketplace experiences using Next.js, React, TypeScript, Tailwind CSS, and Redux. Built auction and Buy It Now flows, real-time search, secure payments, listing moderation, verified-user features, and location-based shipping with Swiss Post integration.

Muslim & Quran - Comprehensive Islamic Platform: Built a feature-rich Quran reader with multiple Arabic script styles, translations, transliterations, audio recitations, Tajweed controls, and easy navigation for Surahs, Hizbs, and Rukus with verse bookmarking. Developed embeddable Islamic widgets for prayer times, Hijri date conversion, 99 Names of Allah, Kalimas, and Ramadan countdowns. Also built a Qibla Compass with device orientation support, a location-based prayer time system, and a Zakat Calculator with rule-based calculation logic.

EDUCATION

Bachelor of Science: Information Technology

October 2015 - October 2019

University of Education, Lahore - Pakistan

Coursework covered web development fundamentals, networking, database management, software engineering, and modern computing principles.

LANGUAGES

Languages: English, Urdu
